## AUGUST 2009

Date	Course Name	Days	Price	Description
8/3 - 8/7	Implementing a Microsoft SQL Server 2008 Database	5	1,975.00	This five-day instructor-led course provides students with the knowledge and skills to implement a Microsoft SQL Server 2008 database. The course focuses on teaching individuals how to use SQL Server 2008 product features and tools related to implementing a database.
8/10 - 8/14	Planning and Administering Windows Server 2008 Servers	5	1,975.00	This five-day instructor-led course provides students with the knowledge and skills to implement, monitor, and maintain Windows Server 2008 servers.
8/17 - 8/21	Exchange 2007 Boot Camp	5	2,900.00	This 5 day Boot Camp is a deep dive into Exchange 2007. It will combine key modules of Microsoft Courses 5047, 5049, 5050, 5051, 5053 and 5054. The course hours will be extended to 8am to 5pm each day. This course is designed for those wanting an extensive working knowledge of Microsoft Exchange 2007. Those attending should be prepared for intensive lecture, discussion and hands on labs. The course will also help to prepare you for taking the Exchange 2007 Certification Exams.
8/17 - 8/21	Web Design Boot Camp	5	1,500.00	Have you ever wanted to know how to design a website from start to finish? Individual product classes teach you how to use a product and assume you are already a web developer. This boot camp makes no assumptions and takes you from the concept of web design, through the use of fireworks for Graphics, HTML and CSS for coding, Dreamweaver for web site development, Flash for banners and flash elements and ends with a full site upload to a unique URL. Once uploaded, you will then develop skills in editing and maintaining a website.

Learning Solutions

The Technology Specialist certifications enable professionals to target specific technologies and distinguish themselves by demonstrating in-depth knowledge of and expertise in the technologies with which they work.

Microsoft Certified Technology Specialists in SQL Server 2005 (MCTS: SQL Server 2005) implement and maintain databases using specific instructions and specifications. They have thorough knowledge of the product, understand how to use the tools and Transact-SQL language, and know how to navigate the user interface. Technology Specialists are typically pursuing careers as a database administrator, database developer, or business intelligence developer. They may also be individuals such as developers and systems administrators who do not work with SQL Server on a daily basis but wish to show their breadth of technology experience.

8/31 - 9/4 SQL 2005 Boot Camp 5 2,900.00

Learning Solutions

SEPTEMBER 2009

Dates	Course Name	Days	Price	Description
9/8 - 9/10	Windows PowerShell for Administrators	3	1,185.00	This three-day hands-on class will introduce administrators to the new Windows command-line shell, Windows PowerShell. Windows PowerShell offers both a command-line interface as well as a scripting environment. With connectivity to Microsoft products such as Microsoft Exchange Server 2007, Microsoft System Center Operations Manager (MOM 2007), and many more, Windows PowerShell provides a consistent interface to more easily control system administration and accelerate automation. It runs on Windows XP Service Pack 2 (SP2), Windows Server 2003, Windows Vista, and Windows Server 2008.
9/9 - 9/11	Implementing Microsoft Office SharePoint Server 2007	3	1,185.00	This three-day instructor-led course provides students with the knowledge and skills required to implement Microsoft Office SharePoint Server 2007 successfully in their organization
9/14 - 9/18	CompTIA A+ Certification Course	5	\$1,975.00	If you are getting ready for a career as an entry-level information technology (IT) professional or personal computer (PC) service technician, the CompTIA® A+® Certification course is the first step in your preparation. The course will build on your existing user-level knowledge and experience with personal computer software and hardware to present fundamental skills and concepts that you will use on the job. In this course, you will acquire the essential skills and information you will need to install, upgrade, repair, configure, troubleshoot, optimize, and perform preventative maintenance of basic personal computer hardware and operating systems.
9/14 - 9/18	Configuring, Managing, and Maintaining Windows Server 2008 Servers	5	1,975.00	This five-day instructor-led course combines five days worth of instructor-led training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008 to provide students with the knowledge and skills that are required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data in a Microsoft Windows Server 2008 environment. This course covers the core skills required by anyone working with Windows Server 2008 Servers.

Learning Solutions

9/21 - 9/24	Install, Configure and Beyond	4	3,295.00	A complete course for all beginning and intermediate students with over 70% of all materials devoted to "Live Labs." Students will complete the course with a comprehensive knowledge of ESX Server, VCenter and Virtual Machine Architecture, as well as advanced management techniques. Students will: Build their own ESX Server, Build VM's, Create Virtual Machine Clones, Migrate a physical computer to a Virtual Machine, Use a wide variety of third-party tools, Install VCenter, Configure a cluster, Initiate Vmotion, See High Availability in action, Secure their ESX Server, and Much, much more...
9/21 - 9/25	Implementing System Center Data Protection Manager 2007	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to protect and recover data using System Center Data Protection Manager 2007 (DPM).
9/28 - 10/2	SQL 2005 to 2008 Boot Camp	5	2,900.00	Description coming soon
9/28 - 10/2	CompTia Network Plus Certification Course (2009 Objectives)	5	\$1,975.00	The CompTIA Network+® (2009 Objectives) course builds on your existing user-level knowledge and experience with personal computer operating systems and networks to present fundamental skills and concepts that you will use on the job in any type of networking career. If you are pursuing a CompTIA technical certification path, the CompTIA A+ certification is an excellent first step to take before preparing for the CompTIA Network+ certification.

OCTOBER 2009

Dates	Course Name	Days	Price	Description
Special Split Course Part 1: 10/5 - 10/7 Part 2: 10/12 - 10/13	Configuring, Managing, and Maintaining Windows Server 2008 Servers	5	\$1,975.00	This five-day instructor-led course combines five days worth of instructor-led training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008 to provide students with the knowledge and skills that are required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data in a Microsoft Windows Server 2008 environment. This course covers the core skills required by anyone working with Windows Server 2008 Servers.
Special Split Course Part 1: 10/8 - 10/9 Part 2: 10/14 - 10/16	Implementing a Microsoft SQL Server 2008 Database	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to implement a Microsoft SQL Server 2008 database. The course focuses on teaching individuals how to use SQL Server 2008 product features and tools related to implementing a database.
10/5 - 10/9	CompTIA Security+ (2008 Objectives)	5	\$1,975.00	CompTIA Security+® (2008 Objectives) is the primary course you will need to take if your job responsibilities include securing network services, network devices, and network traffic. It is also the main course you will take to prepare for the CompTIA Security+ (2008 Edition) Certification examination (exam number SY0-201). In this course, you will build on your knowledge and professional experience with computer hardware, operating systems, and networks as you acquire the specific skills required to implement basic security services on any type of computer network.
10/19 - 10/23	Exchange 2007 Boot Camp	5	\$2,900.00	This 5 day Boot Camp is a deep dive into Exchange 2007. It will combine key modules of Microsoft Courses 5047, 5049, 5050, 5051, 5053 and 5054. The course hours will be extended to 8am to 5pm each day. This course is designed for those wanting an extensive working knowledge of Microsoft Exchange 2007. Those attending should be prepared for intensive lecture, discussion and hands on labs. The course will also help to prepare you for taking the Exchange 2007 Certification Exams.

Learning Solutions

10/19 - 10/21	Linux Fundamentals	3	\$1,185.00	Students will install Linux, configure the X Window System, and learn to navigate the Linux command-line shell. Students will also learn fundamental concepts common to Linux: the kernel, Linux filesystem, boot process and runlevels, shell scripting, and editing text files.
10/22 - 10/23	Linux System Administration	2	\$790.00	Students will gain hands-on experience with kernel customization, package management, process and disk management, as well as user and group management.
10/26 - 10/30	SharePoint 2007 Boot Camp	5	\$2,500.00	This 5 day Boot Camp is a deep dive into SharePoint 2007 and WSS 3.0. It will combine key modules of Microsoft Courses 5060, 5061 and 50046. In addition we will be covering information on deploying SharePoint to end users. The course hours will be extended to 8am to 5pm each day. This course is designed for those wanting an extensive working knowledge of Microsoft SharePoint 2007. Those attending should be prepared for intensive lecture, discussion and hands on labs. The course will also help to prepare you for taking the SharePoint 2007 Certification Exams.

NOVEMBER 2009

Dates	Course Name	Days	Price	Description
11/2 - 11/6	CompTIA A+ Certification Course	5	\$1,975.00	If you are getting ready for a career as an entry-level information technology (IT) professional or personal computer (PC) service technician, the CompTIA® A+® Certification course is the first step in your preparation. The course will build on your existing user-level knowledge and experience with personal computer software and hardware to present fundamental skills and concepts that you will use on the job. In this course, you will acquire the essential skills and information you will need to install, upgrade, repair, configure, troubleshoot, optimize, and perform preventative maintenance of basic personal computer hardware and operating systems.
Special Split Course Part 1: 11/2 - 11/4 Part 2: 11/9 - 11/10	Implementing a Microsoft SQL Server 2005 Database	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to implement a Microsoft SQL Server 2005 database. The course focuses on teaching individuals how to use SQL Server 2005 product features and tools related to implementing a database.
Special Split Course Part 1: 11/5 - 11/6 Part 2: 11/11 - 11/13	Planning and Administering Windows Server 2008 Servers	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to implement, monitor, and maintain Windows Server 2008 servers.
11/9 - 11/13	Planning, Deploying and Managing Microsoft Systems Center Configuration Manager 2007	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to plan, deploy, and manage Configuration Manager 2007. The course focuses on planning and deploying sites and clients, configuring software distribution, deploying operating systems, and managing software updates. It also focuses on remote tools and managing mobile devices.
11/16 - 11/20	Updating your Network Infrastructure and Active Directory Technology Skills to Windows Server 2008	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to work with Network Infrastructure and Active Directory technologies in Windows Server 2008. This course is intended for individuals who already have experience with Network Infrastructure and Active Directory technologies in Windows Server 2000 or Windows Server 2003 to upgrade their skills to Windows Server 2008.

Learning Solutions

11/16 - 11/20	CompTia Network Plus Certification Course (2009 Objectives)	5	\$1,975.00	The CompTIA Network+® (2009 Objectives) course builds on your existing user-level knowledge and experience with personal computer operating systems and networks to present fundamental skills and concepts that you will use on the job in any type of networking career. If you are pursuing a CompTIA technical certification path, the CompTIA A+ certification is an excellent first step to take before preparing for the CompTIA Network+ certification.
Special Split Course Part 1: 11/23 - 11/25 Part 2: 11/30 - 12/1	Maintaining a Microsoft SQL Server 2005 Database	5	\$1,975.00	This five-day instructor-led course provides students with the knowledge and skills to maintain a Microsoft SQL Server 2005 database. The course focuses on teaching individuals how to use SQL Server 2005 product features and tools related to maintaining a database

Learning Solutions

DECEMBER 2009

Dates	Course Name	Days	Price	Description
12/2 - 12/4	Windows PowerShell for Administrators	3	1,185.00	This three-day hands-on class will introduce administrators to the new Windows command-line shell, Windows PowerShell. Windows PowerShell offers both a command-line interface as well as a scripting environment. With connectivity to Microsoft products such as Microsoft Exchange Server 2007, Microsoft System Center Operations Manager (MOM 2007), and many more, Windows PowerShell provides a consistent interface to more easily control system administration and accelerate automation. It runs on Windows XP Service Pack 2 (SP2), Windows Server 2003, Windows Vista, and Windows Server 2008.
12/7 - 12/8	Implementing Windows SharePoint Services 3.0	2	\$790.00	This two-day instructor-led course provides students with the knowledge and skills to successfully implement Microsoft Windows SharePoint Services (WSS) version 3.0 in their organizations. It emphasizes that students should think about the architecture of their entire environment, including business and application needs, during the planning and deployment phases. The course covers how to perform a clean installation of WSS 3.0 and also describes all the prerequisites required to select the most appropriate method for upgrading WSS from 2.0 to 3.0 in a specific scenario. In addition, the course focuses on how to manage WSS after it is configured
12/7 - 12/9	Implementing and Managing Windows Server 2008 Hyper-V	3	\$1,185.00	This three-day instructor-led course teaches students how to implement and manage Windows Server 2008 Hyper-V. It also teaches students how to manage Hyper-V with Solution Center Virtual Machine Manager (SCVMM) and with PowerShell.
12/7 - 12/9	Linux Fundamentals	3	\$1,185.00	Students will install Linux, configure the X Window System, and learn to navigate the Linux command-line shell. Students will also learn fundamental concepts common to Linux: the kernel, Linux filesystem, boot process and runlevels, shell scripting, and editing text files.
12/10 - 12/11	Linux System Administration	2	\$790.00	Students will gain hands-on experience with kernel customization, package management, process and disk management, as well as user and group management.
12/10 - 12/11	Monitoring and Troubleshooting Microsoft Exchange Server 2007	2	\$790.00	This two-day workshop teaches messaging specialists to monitor and troubleshoot an Exchange Server 2007 messaging system. Students will learn how to correlate client and server issues and resolve those issues. They will also learn how to monitor systems and create reports from the monitoring data.

Learning Solutions

12/14 - 12/16	Implementing Microsoft Office SharePoint Server 2007	3	\$1,185.00	<p>This three-day instructor-led course provides students with the knowledge and skills required to implement Microsoft Office SharePoint Server 2007 successfully in their organization</p>
12/14 - 12/18	CompTIA Security+ (2008 Objectives)	5	\$1,975.00	<p>CompTIA Security+® (2008 Objectives) is the primary course you will need to take if your job responsibilities include securing network services, network devices, and network traffic. It is also the main course you will take to prepare for the CompTIA Security+ (2008 Edition) Certification examination (exam number SY0-201). In this course, you will build on your knowledge and professional experience with computer hardware, operating systems, and networks as you acquire the specific skills required to implement basic security services on any type of computer network.</p>
12/17 - 12/18	Configuring and Troubleshooting Windows Server 2008 Terminal Services	2	\$790.00	<p>This two-day instructor-led course provides students with the knowledge and skills to configure, manage, monitor, and troubleshoot a Terminal Services (TS) environment. The course focuses on configuring of TS core functionality, licensing, Gateway, and Web Access. This is the second course in the Windows Application Platform Services Technology Specialists Who Use Windows Server 2008 curriculum and will introduce the students to the Windows 2008 Terminal Services.</p>
